

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N° 768681.

## **PRIVACY STATEMENT**

### **DATA PROCESSING OPERATION: 'EPPN PLATFORM DATABASE'**

#### **1. Introduction**

EPPN, the European Network for Pilot Production Facilities and Innovation Hubs – is the world's first single entry point dedicated to promote accelerate the development of technology enabled products through an interactive business to business digital marketplace linking technology providers with technology up takers, and by facilitating cross-border access to specialized facilities and expertise.

EPPN interactive digital platform connects Pilot Production Facilities and Open Innovation Testbeds (OITBs) with technology users (SMEs, startups and large enterprises) and also brings together different actors along value chains.

Once registered in the platform, users have the opportunity to show case their services, look for solutions in terms of technology and expertise, exchange information, build collaborations and increase business opportunities. Apart from the typical functionalities of a digital marketplace, the platform also allows for matchmaking and social networking facilities without typical search.

EPPN digital platform integrates other databases, namely the KET Technology Centres and the Digital Innovation Hubs catalogue, and thus allowing the access to an extended network of high-quality and reliable infrastructures and expertise in digital technologies and other key enabling technologies.

Overall, EPPN aims to facilitate transnational access to high-quality, reliable infrastructures, expertise and services for a faster market entry and increased return from investment in research and this way contribute to the competitiveness of European industry.

The EPPN project has received funding from European Union programme (H2020) under grant agreement No. 768681. The EPPN Consortium is composed by the following partners:

1. International Iberian Nanotechnology Laboratory (INL)
2. Cambridge Nanomaterials Technology LTD (CNT)
3. Onvega AB (Onvega)
4. Fundacion Idonial (IDONIAL)
5. MBN Nanomaterialia SPA (MBN)
6. Acondicionamiento Tarrasense Asociacion (LEITAT).

#### **2. Purpose**

The purpose of this data processing operation is to provide, operate, manage, maintain, and enhance the EPPN Platform and allow users to make use of the

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N° 768681.

Platform. The purposes include communication of the project publications, events announcements, dissemination of the EPPN activities; information about the EPPN project, services and contests; to promote innovation and technology transfer; to send survey forms and other communications activities.

### **3. Description of the data processing operation**

The Personal Data is stored in a database of EPPN Consortium named "EPPN Platform Database".

### **4. Data processed**

The data processed, including personal data, contain the following: complete name, nationality, place of work, department and position held, e-mail address, gender, date of birth, address, and phone number.

### **5. Controller of the processing operation**

The ONVEGA AB, is responsible for the management of the data processed under this operation.

### **6. Legal Basis**

The processing of personal data is required to contact and receive information regarding the activities developed by the EPPN Project. Therefore, not providing the required personal data or not accepting the privacy statement concerning this data processing operation will render it impossible to register, submit or receive information regarding said activities. In accordance with the Regulation UE no. 2016/679 (General Data Protection Regulation), where applicable, as well as any other legislation or regulatory requirements in force from time to time which apply to each Party relating to the use of personal data, the EPPN Consortium assures that the personal data obtained from your submission will be incorporated into a record, property of the EPPN Consortium, having implemented all security measures.

### **7. Security Measures**

The EPPN Consortium shall ensure that it has in place appropriate technical and organisational measures to protect against unauthorised or unlawful processing of Personal Data and against accidental loss or destruction of, or damage to, Personal Data, appropriate to the harm that might result from the unauthorised or unlawful processing or accidental loss, destruction or damage and the nature of the data to be protected, having regard to the state of technological development and the cost of implementing any measures.

### **8. Recipients of the data**

The EPPN Consortium will have access to the personal data, as well as the project's contractors and, if requested, the Program Managing Authorities ([H2020](#)).

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N° 768681.

Contractors are defined as service providers engaged by the EPPN Consortium to perform specific tasks related to the execution of the EPPN Project. Contractors shall have access to personal data on a specific need-to-know basis, they shall be made aware of this privacy statement and they shall undertake obligations no less onerous than those contained in this statement.

Personal data will not be used for other purposes than those described above. Except for the situations referred to in the previous paragraphs they will not be disclosed to any third parties.

## **9. Legality of processing**

Processing is necessary for the performance of the tasks carried out on EPPN Project, under Grant Agreement n° 768681.

## **10. Provision, access and rectification of the data**

Each person has the right to access his or her own personal data and the right to correct any inaccurate or incomplete personal data, as well as to request the removal of his or her personal data, which will be implemented within 10 working days after your specific request will be deemed legitimate. Queries concerning the processing of personal data may be addressed to the following email: [info@eppn.eu](mailto:info@eppn.eu)

## **11. Time limit for storing data**

Records shall be retained for a period of up 5 years after the project is terminated, or until the request for removing the personal data from our database.
